

What Homeschooling is NOT

- ❖ Program, system, curriculum - there is no single way to do it
- ❖ Crisis Schooling - it is imposed and without any freedom
- ❖ Iglesias-Escuela - you take the child to a school to be educated.
- ❖ Schools "Homeschoolers" - this concept does not exist, the Education Council does not approve institutions that offer "homeschooling" among their offers so if there is some situation, the legal way would be their recourse to follow. You must verify that it meets the requirements of having a business in PR.

When a parent fully delegates the education of their children to third parties, when they are not free to choose and have no control over material, scope, sequence is not considered home education. Homeschooling is not about changing the child's geography (moving him from one place to another), it involves the one who will probably have to change methodologies, curricula to temper everything to his particular needs. Homeschooling is a modality within non-traditional education, it's not everything; there are many methodologies and that doesn't make it be and call it Homeschooling.
